Northeastern Agricultural and Resource Economics Association

A Note from the Presidents

Welcome to this Joint Annual Meeting of the Canadian Agricultural Economics Society (CAES) and the Northeast Agricultural and Resource Economics Association (NAREA). I'm very much looking forward to this meeting. It is a great opportunity to get together with colleagues to share our knowledge at time where there are so many opportunities and challenges in the bioresources. While we face unprecedented grain and energy prices, several environmental, resource and food issues require our urgent attention. The range of topics on the conference program reveal the importance of these very broad, interrelated issues, and clearly reflects the breadth of the economic research our organizations are undertaking to deal with them. Thanks to the hard work of the NAREA/CAES program committee this conference provides participants with one integrated program that combines the work of both organizations.

Richard Gray, CAES President

It is my great pleasure to welcome you to the joint meeting of the Canadian Agricultural Economics Society (CAES) and the Northeastern Agricultural and Resource Economics Association. This continues our history of joint meetings, which has been very beneficial on both the personal and professional levels. I always look forward to this joint meeting. It provides us with stimulating discussion of relevant topics, and with the insight gained from research, extension and teaching professionals working in different, but highly related, environments. The joint meeting this year is particularly timely, given the range of food, agricultural and environmental/resources issues that our two countries, and the world, currently are facing. The program will provide us with considerable opportunity to delve into these issues, and the two program committees have done a great job of working together to give us this opportunity.

Steve Smith, NAREA President
